Interview Tips

Research About Uplers

First thing first. Go through our website and social media handles to get an idea about our services, culture, and values. Next, you can research about your interviewer to know about their experience, professional accomplishments, and specialties. This will give you an edge during the interview, and you will be able to spark a meaningful conversation.

Arrange Your Space

Choose a quiet area for your interview. Remove all distractions and make sure no one disrupts your conversation. Be fully engaged, put your phone on silent mode, and do not divert your attention from the screen while talking.

Check Your Technical Equipments

Make sure you are at least 15 minutes early for the interview. Determine if you will use computer audio or headphones and check all your technical equipments to avoid glitches. Sign in to the video meeting early, do a test run, and ensure you have a stable internet connection with a good speed.

Pro tip: Do not take your interview calls from mobile phones.

Dress the Part/Dress to Impress

Even if it is a virtual interview, it is important to dress appropriately. We would suggest dressing just like you are about to come and meet us in person.

Keep Your Resume Accessible

Keep a digital copy of your resume open on your screen. The interviewer may ask a specific question related to the projects or skills listed on your resume. Having it handy will make it easy for you to refer when required.

Market Yourself

This is your time to shine! Be prepared to tell us why you want this job and what makes you the most suitable for this position. Respond to all questions truthfully and in detail, giving a specific example of relevant skill and previous experience.

Please Ask Questions

Do not hesitate to ask questions. Prepare your questions/queries about the company or role and note them down on a paper. The more questions you ask, the more clarity you will get.
